ABX-101 Analytical Study

HBS-ANA-2026-061 | 29 October 2026 | Draft

Client: Argen Biopharma | Analyst: Minseo Choi | Reviewer: Harin Jung

Samples A and B are illustrative; values are not actual laboratory results.

01 Results by sample and time point

Sample	Time point	Results		Review
		Purity (%)	Recovery (%)	status
A	Initial	98.4	74.2	Reviewed
	Week 4	97.8	72.8	Review needed
B	Initial	97.9	71.5	Repeat check
	Week 4	97.3	69.1	Repeat check

1. The illustrative review threshold is purity >= 98.0%; it is not a final specification.

02 Units and calculation

Measured concentration: 0.15 mg/mL | Dilution factor: 10

Calculated concentration = 0.15 x 10 = 1.50 mg/mL

Illustrative storage: 2-8 degrees C | Impurity review threshold: <= 0.25%

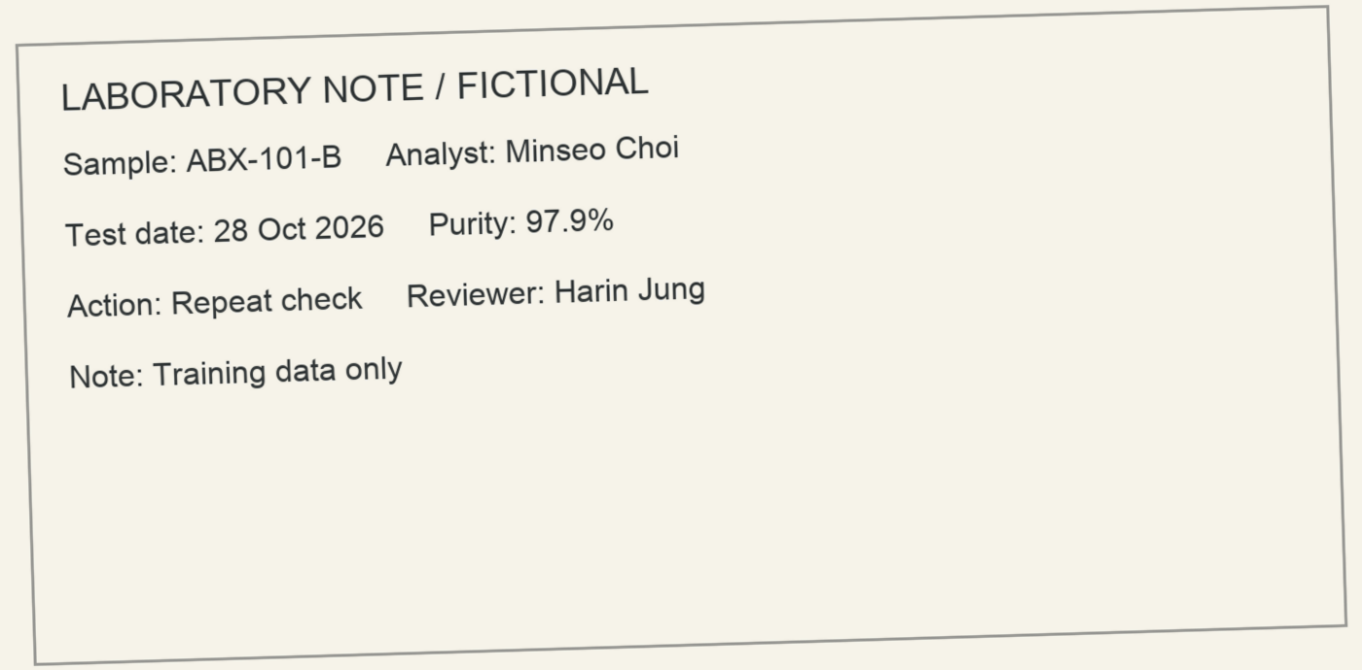

ABX-101 Review Record

HBS-ANA-2026-061 | Scanned note and review state

03 Review checklist

- [x] Sample identity verified
- [x] Calculation reviewed
- [ ] Final client approval
